15	Ret. Rev. 3 R	-	-	-	-
16	Ret. Delay	-	-	-	-
17	Talk back / CD	SM58	-	-	-

Notes :

L'organisateur doit mettre a disposition du groupe et de son ingénieur un système de sonorisation de haute qualité, adapté à la salle ou au lieu, de même qu'une équipe assurant l'installation et l'assistance technique.

The organizer must place for the group and his engineer a high quality system of wiring for sound, adapted to the room or the place, just as a team ensuring the installation and the technical aid.

Sauf indication contraire, il est précisé qu'un ingénieur retour est nécessaire!!!

Unless otherwise specified a sound engineer for monitors is necessary!!!

1 DI box needed, these should be active with earth lift and input attenuators. Delay should feature real-time tap function or foot trigger and **MUST** return via channel input, not via aux returns.

The Mixing console should be positioned at ground level central to the stage not closer than 15m, not further than 40m.

Please do not place console on risers.

Please make sure all vocal microphones have been cleaned with a low odour antiseptic wash before use.

PA :

Diffusion : 3 or 4 voies actives type Meyer / EV / L Acoustics / Audio-Performance
Minimum 24 tracks, 4 aux, Vca, parametric EQ type MIDAS XL200, XL3, Héritage Venice 320, SSL, DiGiCo D5, D1.

NO YAMAHA, NO BEHRINGER

Contrôle : 5 channels compressors
1 stereo EQ 1/3 octave minimum 20 bands
2 digital reverb SPX990
1 digital reverb M-one
1 digital delay D-Two
1 CD player
1 talk back

MON:

Diffusion : 4 Wedges, 2 sides fills
Controls : 2 stereo EQ 1/3 octave minimum 20 bands
Mix : 4 separated lines
